

Korn and Bash Shell Programming

Kód kurzu: AN202G

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

Pro koho je kurz určen

This advanced-level course is for support staff for AIX on POWER systems.

Co Vás naučíme

You will have a firm grounding in the Perl language and be able to:

- Write Perl scripts for data-processing, system administration, and other applications
- Use modules from the Perl Module Library to improve your efficiency

Požadované vstupní znalosti

You should have:

- An understanding of programming fundamentals: variables, flow control concepts such as repetition and decision.
- A working knowledge of AIX including the use of the vi editor, find and grep commands.
- Students without this experience should attend AIX Basics (AN10G).

Osnova kurzu

Basic shell concepts

Flow control in a shell Script

Functions and typeset

Shell features such as arithmetic and string handling

Using regular expressions

Using sed, awk and other AIX utilities
