Implementing SAP S/4HANA Cloud Private Edition

Kód kurzu: S4C03

This course guides learners through the fundamental requirements and knowledge necessary for customer project team key users, IT Professionals, Solution Architects, and Project Managers who are beginning their journey into SAP S/4HANA Cloud Private Edition implementations. Focus will be on key SAP Activate driven concepts to give learners an opportunity to explore SAP S/4HANA Cloud Private Edition best practices, a sampling of solution area scope overviews, learning data migration for SAP S/4HANA Cloud Private Edition, as well as fundamental product configuration and UI extensibility. There are hands-on exercises and demonstrations to give learners the opportunity to practice on a live training environment.After attending this course, you can augment your learning by joining the SAP S/4HANA Cloud Implementation Learning Room and take advantage of the live sessions across fundamentals, cross-topics and lines of business deep dive topics. You will need a valid subscription to the SAP Learning Hub SAP S/4HANA Cloud solution edition to take advantage of live sessions and any digital content.

Pro koho je kurz určen

- Application Consultant
- Business Analyst

- Business Process Owner / Team Lead / Power User
- Change Manager
- Data Consultant / Manager
- Database Administrator
- Developer
- Development Consultant
- Enterprise Architect
- Help Desk/CoE Support
- Industry Specialist
- Program/Project Manager
- Solution Architect
- System Administrator
- System Architect
- Technology Consultant
- Trainer
- Customer Key User

Co Vás naučíme

This course will prepare you to:

- Identify characteristics of SAP S/4HANA Cloud Private Edition
- Describe the customer transition paths to SAP S/4HANA Cloud Private Edition
- Describe key stakeholders and responsibilities
- Explore system landscapes
- Navigate release upgrades
- Review initial communications and system provisioning
- Set up the implementation project in SAP Cloud ALM
- Deploy a sandbox system
- Perform system preparation activities for system conversions
- Give an overview of Identity Access Management
- Create users in SAP S/4HANA Cloud Private Edition
- Assign permissions to users
- Manage content on SAP Fiori Launchpad

GOPAS®

- Describe Fit-to-Standard Analysis Workshops

Požadované vstupní znalosti

Essential
- S4CP01 – Exploring SAP Cloud ERP

Recommended
- none

Studijní materiály

Studijní materiál SAP.

Osnova kurzu

Introducing SAP S/4HANA Cloud Private Edition
- Identifying characteristics of SAP S/4HANA Cloud Private Edition
- Describing the customer transition paths to SAP S/4HANA Cloud Private Edition

Building the Implementation Team
- Describing key stakeholders and responsibilities

Defining System Landscapes
- Exploring system landscapes
- Navigating release upgrades

Setting up Systems for Implementation
- Reviewing initial communications and system provisioning
- Setting up the implementation project in SAP Cloud ALM
- Deploying a sandbox system
- Performing system preparation activities for system conversions

Creating Users and Defining Authorizations
- Giving an overview of Identity Access Management
- Creating users in SAP S/4HANA Cloud Private Edition
- Assigning permissions to users
- Managing content on the SAP Fiori Launchpad

Gathering Data in Fit-to-Standard Workshops
- Describing Fit-to-Standard Analysis Workshops
- Preparing for Fit-to-Standard Analysis Workshops
- Conducting Fit-to-Standard Analysis Workshops
- Conducting design workshops

Validating and Configuring Business Processes
- Defining Business Process Configurations for new implementations
- Exploring partner solutions

Working with the SAP Fiori Launchpad

- Navigating the SAP Fiori Launchpad
- Using the embedded support capabilities and the Joule Generative AI assistant
- Managing teams and responsibilities
- Reviewing the situation handling framework
- Exploring flexible business workflows
- Describing embedded analytics

Customizing Applications
- Describing the extensibility tools for customizations in SAP S/4HANA Cloud Private Edition
- Using the key-user in-app extensibility tools in SAP S/4HANA Cloud Private Edition
- Using developer in-app extensibility in SAP S/4HANA Cloud Private Edition
- Using side-by-side extensibility with SAP Business Technology Platform
- Analyzing customizations after system conversion

Setting up Integrations
- Analyzing the integration landscape
- Setting up integrations with available resources
- Monitoring integrations with SAP Cloud ALM

Migrating Data
- Migrating data to SAP S/4HANA Cloud Private Edition

Testing Configured Business Processes
- Explaining the test strategy
- Preparing test plans in SAP Cloud ALM
- Conducting automated business process tools
