Co musíte vědět

- In this course you will learn how to install different SAP systems, including technical pre- and post-installation steps of the installation. As examples for the different types of SAP systems you will install an SAP S/4HANA Server system including the SAP HANA database, and an SAP Solution Manager system. These SAP systems will be installed on different operating systems (Linux and Windows) using different databases (SAP HANA DB and SAP MaxDB).
- After successfully attending ADM110, participants should also be capable of installing SAP ECC systems on different operating systems and databases.
