

Red Hat Certified Specialist in Cloud-native Integration exam

Kód kurzu: EX221

The Red Hat Certified Specialist in Cloud-native Integration Exam (EX221) tests your abilities to create and maintain enterprise integration services using Camel with Red Hat® Fuse. An enterprise application developer who becomes a Red Hat Certified Specialist in Cloud-native Integration has demonstrated the skills, knowledge, and abilities needed to create and maintain enterprise integration services based on the Red Hat Fuse framework and application programming interfaces (APIs) for Apache Camel. By passing this exam, you become a Red Hat Certified Specialist in Cloud-native Integration which also counts toward becoming a Red Hat Certified Architect (RHCA®). Objectives listed for this exam are based on the most recent Red Hat product version available.

Red Hat Certified Specialist in Cloud-native Integration exam

Use EIPs

- Content-based routing
- Wire tap
- Splitter
- Aggregator
- Recipient list

Use Camel components

- File2
- FTP
- JPA2
- JMS
- Direct
- Rest

Use Camel Test

- Mock endpoints
- JUnit 4 integration and Camel Test APIs

Dynamically route messages

- Use conditional routes
- Use data-driven routes

Handle exceptions

- Catch and handle exceptions
- Use the dead-letter queue

As with all Red Hat performance-based exams, configurations must persist after reboot without intervention.

Co musíte vědět

Preparation

Red Hat encourages you to consider taking Cloud-native Integration with Red Hat Fuse (AD221) course to help prepare.

Attendance in these classes is not required; students can choose to take just the exam.

While attending Red Hat classes can be an important part of your preparation, attending class does not guarantee success on the exam. Previous experience, practice, and native aptitude are also important determinants of success. Many books and other resources on system administration for Red Hat products are available. Red Hat does not endorse any of these materials as preparation guides for exams. Nevertheless, you may find additional reading helpful to deepen your understanding.

Exam format

This exam is a performance-based evaluation of your Camel development skills and knowledge. You will perform tasks associated with the development and maintenance of enterprise integration patterns using Red Hat Fuse. Performance-based testing means that you must perform tasks similar to those you perform on the job.

Internet access is not provided during this closed exam, and you will not be permitted to bring any hard copy or electronic documentation into the exam. This prohibition includes notes, books, or any other material. However, you are provided with a local copy of the official Fuse documentation. You should familiarize yourself with this documentation when preparing for the exam.

Scores and reporting

Official scores for exams come exclusively from Red Hat Certification Central. Red Hat does not authorize examiners or training partners to report results to candidates directly. Scores on the exam are usually reported within 3 U.S. business days.
